## GLOBAL GREEN TAG INTERNATIONAL

### Conica AG

# CONIPUR Impermeable Running Track Solutions

CONICA solutions for running tracks – each holding the WA product certificate. Independently tested, seamless, easy to maintain. Characterized by high durability and weather resistance, ensuring maximum performance and functionality over decades.

CONIPUR Vmax, CONIPUR M, CONIPUR MX+, CONIPUR SW, CONIPUR SW PF, **Products/Ranges:** CONIPUR JIP soft, CONIPUR Vmax jogging track Whole of life +re-use potential **Product Stages Assessed:** Product Type: **Flooring System** 09 67 00 **CSI** Masterformat: Licenced Site/s: **Munster Germany** Licence Number: CON:CO04:2022:PH Licence Date: 16th June 2022 Valid To: 16th June 2025 Standard: GGT International v4.0 Screening Date: 16th June 2022 https://www.globalgreentag.com/certificate/1270/ PHD URL:

GLOBAL GREENTAG

Platinum HEALTH

PHD Summary Percentage Assessed: 100	Inventory Threshold: 0 100ppm Product Level	Inventory Method: Nested Materials

SreenTag Banned List Compliant.

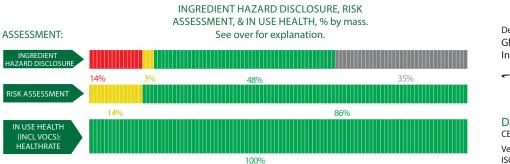

ScreenTag PHD recognized by WELL \* & LEED \* Material Transparency & Optimization credits included below:

Meets Green Star \* 'Buildings v1.0' as Recognized for Credit 9: Responsible Finishes;

Meets IWBI<sup>\*</sup> WELL<sup>\*</sup> v1.0 as Recognized for Feature 26 (Part 1); Feature 97 (Part 1); and meets IWBI<sup>\*</sup> WELL<sup>\*</sup> v2.0 as Recognized for Feature X07 (Parts 1& 3); X08 (Part 2); as a Compliant Technical Document (Audited) for X07 (Part 2); X08 (Part 1).

Meets USGBC LEED\* v4.0 and v4.1 Rating Tool Credit as Recognized for MR Credit: Building Product Disclosure and Optimisation - Material Ingredients - Option 1: Material Ingredient Reporting, Option 2: International ACP - REACH Optimisation.

Independent third party assessment for worker, user, and environmental exposure to any Carcinogens, Mutagens, Reproductive Toxicant or Endocrine Disruptors.

Declared by: Global GreenTag International Pty Ltd

David Baggs CEO Verified compliant with: ISO 14024 & ISO 17065

# ning Track Solutions ding the WA product certificate. Inde-Characterized by high durability and mance and functionality over decades.

CONIPUR Impermeable Running Track Solutions, Conica AG, https://www.globalgreentag.com/certificate/1270/

#### 1.0 Scope

The Global GreenTag International (GGT) Product Health Declaration (PHD) has been designed to provide an additional level of service to the green product sector in facilitating an easier understanding of both the hazard and risk associated with any certified products and is intended to indicate:

- Chemical hazards of both finished product and unique ingredients to a minimum level of 100ppm for final product throughout the product life cycle, (including any VOC or other gaseous emissions);
- An assessment of exposure or risk associated with ingredient handling, product use, and disposal in relation to established mitigation and management processes;

It is not intended to assess:

- i. substances used or created during the manufacturing process unless they remain in the final product; or
- ii. substances created after the product is delivered for end use (e.g., if the product unusually degrades, combusts or otherwise changes chemical composition).

GGT PHDs are only issued to products that have passed GGT Standards' certification requirements. The Level of Assessment (BronzeHEALTH, SilverHEALTH GoldHEALTH or PlatinumHEALTH) rating relates ONLY to GGT Standard Sustainability Assessment Criteria 3, and is declared separately to the overall Bronze, Silver Gold or Platinum Green Tag Certification Mark Tier Levels.

#### 1.2 Preparing an PHD

GGT PHDs are prepared using Hazard Classifications from the UN Globally Harmonised System of Classification and Labelling of Chemicals (GHS) and as an outcome of a successful Application for Certification. Assessments are undertaken by GGT Qualified Exemplar Global Lead Auditors and subsequently accepted for Certification by the GGT Program Director (also a Qualified Exemplar Global Lead Auditor) under the Personal Products Standard v1.0/1.1, and Cleaning Products Standard v1.1/1.2 and above Program Rules.

#### 1.3 External Peer Review

Every GGT PHD is independently peer reviewed by an external Consultant Toxicologist and Member of the Australian College of Toxicology & Risk Assessment.

#### 2.0 Declaration of Ingredients

Where a manufacturer wishes recognition under a rating program that requires transparency of ingredients such as LEED v4.0 & v4.1, WELL v1 & v2, Living Building Challenge, Estidama etc., the following information is declared from audit:

Colour	Ingredient Hazard Disclosure
Green	Level 4 The hazard level of this ingredient indicates that the ingredient has no toxic hazard statements with no identified health effects.
Yellow	Level 3 The hazard level of this ingredient indicates that the ingredient is mildly toxic and/or has short/medium term reversible health effects.
Orange	Level 2 The hazard level of this ingredient indicates that the ingredient is moderately toxic and/or with a moderate health effects.
Red	Level 1 The hazard level of this ingredient indicates that the ingredient is highly toxic with a potential for severe health effects.
Black	Level 0 The hazard level of this ingredient indicates that the ingredient is highly toxic with a potential for severe health effects and is banned from being detectable above trace amounts in the final product.
Grey	Grey Chemical Not able to be categorised due to lack of toxicity impact information.
Colour	Risk Assessment & In Use Health Assessment Outcome
Green	No Concerns The risk assessment outcomes for the hazard level and percentage of ingredient used in the product after risk assessment is consid- ered highly unlikely and therefore without concerns.
Yellow	Human Health Comment The risk assessment outcome for the hazard level and percentage of ingredient used in the product is after risk assessment considered low with an unlikely potential risk.
Orange	Issue of Concern or Issue of Concern Minimised The risk assessment outcome for the hazard level and percentage of ingredient used in the product is after risk assessment considered Iow to high with a higher than unlikely potential for risk.
Red	Red Light Comment or Red Light Comment Minimised The risk assessment outcome for the hazard level and percentage of ingredient used in the product is after risk assessment considered low to extremely high with a moderate potential for risk.
Dark Red	Red Light Exclusion The risk assessment outcome for the hazard level and percentage of ingredient used in the product is after risk assessment considered medium to extremely high with a likely potential for risk.
Grey	Grey Chemical Not able to be categorised due to lack of toxicity impact information.
Black	Banned Ingredients Level 0 Hazard Level categorised chemicals such as Substances of Very High Concern in the International Standard v4.0/v4.1 and/or Petroleum, Parabens plus a wide range of additional compounds stipulated by the Personal Products Standard v1.0/1.1 and Cleaning Products Standard v1.1/1.2

Global GreenTag International Pty Ltd (Global GreenTag) is not a medical professional organisation. Global GreenTag does not purport to provide medical advice, and makes no warranty, representation, or guarantee regarding the declaration that it provides in relation to any allergies, chemical sensitivities or any other medical condition, nor does Global GreenTag assume any liability whatsoever arising out of the application or use of any product or piece of equipment that has been chemically assessed by Global GreenTag.

The chemical assessments carried out provide transparent information peer reviewed by a consultant toxicologist regarding the chemical make-up and ingredients of certain materials and products, but such assessments are not to be taken as any form of medical assessment or health advice and are not targeted towards providing specific solutions to allergenic conditions or any other type of medical concerns.

Users must carry out their own investigations if they are concerned about specific medical conditions and the impact of certain products or ingredients in relation to specific medical concerns.

Global GreenTag takes no responsibility and is not liable in any way with respect to any medical or health issues arising from a person's use of materials or products that have been chemically assessed by Global GreenTag. Global GreenTag shall not be liable for any direct, indirect, punitive, incidental, special or consequential damages to property or life whatsoever, arising out of or connected with the use or misuse of any materials or products that have been assessed by Global GreenTag.

## Product Health Declaration

IARC Group:

IARC 2B: Possibly Carcinogenic to human IARC 3: Not classifiable as to its carcinogenity to human

Candidate list (ECHA)

Comments:

1. The final product can release toxic material if burnt. 2. The manufacturer has an OHS policy and Environmental Management system in place. The manufacturer is ISO9001 and ISO14001 Certified. 3. No VOC Test

**Product Health Declaration** 12
