BT4 Universal Washroom Cleaner

Concentrated cleaning liquid designed for the maintenance of washroom surfaces. It is formulated for dilution with water and has been tested for effective removal of limescale, soap deposits, and general soil from tiles, ceramics, and stainless steel fittings. The product is low-foaming, rinses easily without leaving residues, and is suitable for manual application by mop, cloth, or spray. It is assessed against hygiene and safety requirements relevant to washroom cleaning in commercial and domestic environments.

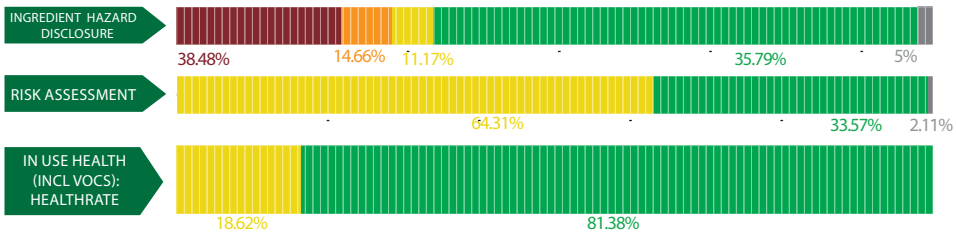
Products/Ranges:	BT4 Universal Washroom Cleaner
Product Stages Assessed:	Whole of life + In-Use
Product Type:	All-Purpose Cleaner
CSI Masterformat:	TBA
Licenced Site/s:	Dukinfield, UK
Licence Number:	GRL:DK03:2025:PH
Licence Date:	23rd October 2025
Valid To:	23rd October 2027
Standard:	Global GreenTag Cleaning Products Standard v1.2
Screening Date:	28th August 2025
PHD URL:	www.globalgreentag.com/certificate/3015

PHD Summary	Inventory Threshold:	Inventory Method:
Percentage Assessed: 100%	100ppm Product Level	Nested Materials

- GreenTag Banned List Compliant.
- GreenTag PHD recognized by WELL ® & LEED ® Material Transparency & Optimization credits included below:
- Meets IWBI ® WELL ® v1.0 as Recognized for ~ Feature 97 (Part 1); as a Compliant Technical Document (Audited) and, meets IWBI ® WELL ® v2.0 as Recognized for ~ X07 (Parts 1, 3); X08 (Part 2); as a Compliant Technical Document (Audited) for ~ X07 (Part 2); X08 (Part 1).
- Meets USGBC LEED® v4.0 and v4.1 Rating Tool Credit as Recognized for MR Credit: Building Product Disclosure and Optimisation - Material Ingredients - Option 1: Material Ingredient Reporting, Option 2: International ACP - REACH Optimisation.
- Independent third party assessment for worker, user, and environmental exposure to any Carcinogens, Mutagens, Reproductive Toxicant or Endocrine Disruptors.

INGREDIENT HAZARD DISCLOSURE, RISK ASSESSMENT, & IN USE HEALTH, % by mass.
See over for explanation.

ASSESSMENT:



Declared by:
Global GreenTag International Pty Ltd

David Baggs
CEO

Verified compliant with:
ISO 14024 & ISO 17065

1.0 Scope

The Global GreenTag International (GGT) Product Health Declaration (PHD) has been designed to provide an additional level of service to the green product sector in facilitating an easier understanding of both the hazard and risks associated with any certified products, and is intended to indicate:

- Chemical hazards of both finished product and unique ingredients to a minimum level of 100ppm for final product throughout the product life cycle (including any VOC or other gaseous emissions);
- An assessment of exposure or risk associated with ingredient handling, product use, and disposal in relation to established mitigation and management processes;

It is not intended to assess:

i. substances used or created during the manufacturing process unless they remain in the final product; or

ii. substances created after the product is delivered for end use (e.g., if the product unusually degrades, combusts or otherwise changes chemical composition).

GGT PHDs are only issued to products that have passed GGT Standards' certification requirements. The Level of Assessment (BronzeHEALTH, SilverHEALTH, GoldHEALTH or PlatinumHEALTH) of a PHD rating relates ONLY to a Human Health Toxicity Assessment and is declared separately and not equivalent to the overall Bronze, Silver Gold or Platinum Green Tag Certification Mark Tier Levels of LCARate.

1.2 Preparing a PHD

GGT PHDs are prepared in the format of a transparency document which utilizes Hazard Classifications from the UN Globally Harmonised System of Classification and Labelling of Chemicals (GHS). Hazard Classifications are then risk assessed with a focus on the In Use stage for an outcome of Certification. Assessments are undertaken by GGT Qualified Exemplar Global Lead Auditors and subsequently accepted for Certification by the GGT Program Director (also a Qualified Exemplar Global Lead Auditor) under the International Standard v4.0/4.1, Personal Products Standard v1.0/1.1, or Cleaning Products Standard v1.1/1.2 and above Program Rules.

1.3 External Peer Review

Every GGT PHD is independently peer-reviewed by an external Consultant Toxicologist and Member of the Australasian College of Toxicology & Risk Assessment.

2.0 Declaration of Ingredients

Where a manufacturer wishes recognition under a rating program that requires transparency of ingredients, such as LEED ® v4.0 & v4.1, WELL ® v1.0 & v2.0, Green Star ®, the following information is declared from the audit:

Colour	Ingredient Hazard Disclosure
Green	Level 4 The hazard level of this ingredient indicates that the ingredient has no toxic hazard statements with no identified health effects.
Yellow	Level 3 The hazard level of this ingredient indicates that the ingredient is mildly toxic and/or has short/medium term reversible health effects.
Orange	Level 2 The hazard level of this ingredient indicates that the ingredient is moderately toxic and/or with a moderate health effects.
Red	Level 1 The hazard level of this ingredient indicates that the ingredient is highly toxic with a potential for severe health effects.
Black	Level 0 The hazard level of this ingredient indicates that the ingredient is highly toxic with a potential for severe health effects and is banned from being detectable above trace amounts in the final product.
Grey	Grey Chemical Not able to be categorised due to lack of toxicity impact information.
Colour	**Risk Assessment & In Use Health Assessment Outcome**
Green	No Concerns The risk assessment outcomes for the hazard level and percentage of ingredient used in the product after risk assessment is considered highly unlikely and therefore without concerns.
Yellow	Human Health Comment The risk assessment outcome for the hazard level and percentage of ingredient used in the product is after risk assessment considered low with an unlikely potential risk.
Orange	Issue of Concern or Issue of Concern Minimised The risk assessment outcome for the hazard level and percentage of ingredient used in the product is after risk assessment considered low to high with a higher than unlikely potential for risk.
Red	Red Light Comment or Red Light Comment Minimised The risk assessment outcome for the hazard level and percentage of ingredient used in the product is after risk assessment considered low to extremely high with a moderate potential for risk.
Dark Red	Red Light Exclusion The risk assessment outcome for the hazard level and percentage of ingredient used in the product is after risk assessment considered medium to extremely high with a likely potential for risk.
Grey	Grey Chemical Not able to be categorised due to lack of toxicity impact information.
Black	Banned Ingredients Level 0 Hazard Level categorised chemicals such as Substances of Very High Concern in the International Standard v4.0/v4.1 and/or Petroleum, Parabens plus a wide range of additional compounds stipulated by the Personal Products Standard v1.0/1.1 and Cleaning Products Standard v1.1/1.2

Global GreenTag International Pty Ltd (Global GreenTag) is not a medical professional organisation. Global GreenTag does not purport to provide medical advice, and makes no warranty, representation, or guarantee regarding the declaration that it provides in relation to any allergies, chemical sensitivities or any other medical condition, nor does Global GreenTag assume any liability whatsoever arising out of the application or use of any product or piece of equipment that has been chemically assessed by Global GreenTag.

The chemical assessments carried out provide transparent information peer reviewed by a consultant toxicologist regarding the chemical make-up and ingredients of certain materials and products, but such assessments are not to be taken as any form of medical assessment or health advice and are not targeted towards providing specific solutions to allergenic conditions or any other type of medical concerns.

Users must carry out their own investigations if they are concerned about specific medical conditions and the impact of certain products or ingredients in relation to specific medical concerns.

Global GreenTag takes no responsibility and is not liable in any way with respect to any medical or health issues arising from a person's use of materials or products that have been chemically assessed by Global GreenTag. Global GreenTag shall not be liable for any direct, indirect, punitive, incidental, special or consequential damages to property or life whatsoever, arising out of or connected with the use or misuse of any materials or products that have been assessed by Global GreenTag.

Ingredient Name	Cas Number OR Function	Proportion in finished product	GHS, IARC & Endocrine Disruptor	Reach Compliance	Ingredient Hazard Disclosure	Risk Assessment	In Use Health Assessment	Comment
Proprietary blend of Microbes and Enzymes								
Proprietary	Microbe Compounds and Enzymes	0.1-1%	None	OK				There is no identifiable risk to the end user. Recycled Content: None Nanomaterials: Unknown
Benzenesulfonic acid, 4-C10-13-sec-alkyl derivs., compds. with 2-propanamine								
Benzenesulfonic acid, 4-C10-13-sec-alkyl derivs., compds. with 2-propanamine	84961-74-0	0.1-1%	None	OK				There is no identifiable risk to the end user. Recycled Content: None Nanomaterials: Unknown
1,2-benzisothiazol-3(2H)-one								
1,2-benzisothiazol-3(2H)-one; 1,2-benzisothiazolin-3-one	2634-33-5	0.1-1%	H302, H315, H317, H318, H334, H400, H410	OK				The substance can cause harm if swallowed (H302), skin irritation (H315), serious eye damage (H318), and may cause allergy or asthma symptoms or breathing difficulties if inhaled (H334), if it comes in direct and concentrated contact — which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. At this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user. Recycled Content: None Nanomaterials: No
Proprietary Fragrance								
cis-2-tert-butylcyclohexyl acetate	20298-69-5	1-5%	H411	OK				The substance can cause skin and eye irritation, and may be harmful to aquatic life if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
2,6-dimethyloct-7-en-2-ol	18479-58-8	1-5%	H319, H315	OK				The substance can cause skin and eye irritation and respiratory irritation if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.

Ingredient Name	Cas Number OR Function	Proportion in finished product	GHS, IARC & Endocrine Disruptor	Reach Compliance	Ingredient Hazard Disclosure	Risk Assessment	In Use Health Assessment	Comment
Decanal	112-31-2	0.01-1%	H412, H319	OK				The substance can cause eye irritation and flammability if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
3,7-dimethylnona-2,6-dienenitrile	61792-11-8	0.01-1%	H411	OK				The substance can cause skin sensitisation and eye irritation if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
Octanal	124-13-0	0.01-1%	H412, H319, H226, H315	OK				The substance can cause skin irritation, eye irritation and respiratory effects if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
Undecan-4-olide	104-67-6	0.01-1%	H412	OK				The substance can cause skin sensitisation and eye irritation if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
Allyl hexanoate	123-68-2	0.01-1%	H301, H311, H331, H400, H412	OK				The substance can cause eye irritation and flammability if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.

DIHYDRO PENTAMETHYLINDANONE (DPMI)	27939-60-2	0.01-1%	H411, H319, H315, H317	OK				The substance can cause skin sensitisation and eye damage if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
Citrathal	147060-73-9	0.01-1%	H315, H412, H225, H319, H226, H317, H411	OK				The substance can cause skin irritation and aquatic toxicity if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
2,6-Octadienal, 3,7-dimethyl-, acid-isomerized	90480-35-6	0.01-1%	H411, H225, H361, H315, H317	OK				The substance can cause skin and eye irritation if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
Geranyl formate	105-86-2	0.01-1%	H400, H411, H317	OK				The substance can cause skin irritation and allergic reactions if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
Bicyclo[2.2.1]hept-5-ene-2-carboxylic acid, 3-(1-methylethyl)-, ethyl ester, (1R,2R,3R,4S)-rel-	116126-82-0	0.01-1%	H411, H317	OK				The substance can cause skin and eye irritation if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.

Ingredient Name	Cas Number OR Function	Proportion in finished product	GHS, IARC & Endocrine Disruptor	Reach Compliance	Ingredient Hazard Disclosure	Risk Assessment	In Use Health Assessment	Comment
(2-endo,3-exo)-Ethyl 3-(1-methylethyl)bicyclo[2.2.1]hept-	116044-44-1	0.01-1%	H411, H317	OK				The substance can cause eye irritation and potential aquatic toxicity if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
Allyl heptanoate	142-19-8	0.01-1%	H301, H311, H400, H412	OK				The substance can cause skin irritation and flammability if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
Citronellal	106-23-0	0.01-1%	H319, H315, H317, H412	OK				The substance can cause skin sensitisation and eye irritation if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
Geranyl acetate	105-87-3	0.01-1%	H412, H315, H317	OK				The substance can cause skin irritation and allergic reactions if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
1-(2,6,6-trimethyl-3-cyclohexen-1-yl)-2-buten-1-one	57378-68-4	<0.01%	H410, H302, H315, H400, H317, None, H319, H411	OK				Below ESCAP limit
Tridec-2-enenitrile	22629-49-8	<0.01%	H400, H410, None, H319, H315, H317	OK				Below ESCAP limit
Alcohols, C12-14, ethoxylated								
Alcohols C12-14, ethoxylated (>2-5EO)	68439-50-9	5-15%	H400, H318, H412, H319	OK				The substance can cause skin and eye irritation and aquatic toxicity if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
Reaction mass of (2S)-Alanine, N,N-bis(carboxymethyl)-, trisodium salt and (2R)-Alanine, N,N-bis(carboxymethyl)-, trisodium salt								

Ingredient Name	Cas Number OR Function	Proportion in finished product	GHS, IARC & Endocrine Disruptor	Reach Compliance	Ingredient Hazard Disclosure	Risk Assessment	In Use Health Assessment	Comment
Alanine, N,N-bis(carboxymethyl)-, trisodium salt	164462-16-2	5-15%	None, H290, H315, H335, H319	OK				The substance can cause eye irritation and potential respiratory irritation if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
Xanthan gum								
Xanthan gum	11138-66-2	5-15%	None, H319, H315, H317	OK				The substance can cause mild eye irritation (low concern) if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
Monopropylene glycol								
Propane-1,2-diol	57-55-6	5-15%	None	OK				The substance can cause mild skin and eye irritation if it comes in direct contact in concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 0.05%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user.
Blue colourant								
Declared substances	Other substance	0.01-1%	None	OK				There is no identifiable risk to the end user. Recycled Content: None Nanomaterials: Unknown
Citric Acid								
citric acid monohydrate	5949-29-1	0.01-1%	H319, H335, H315, H318, None, H303, H313, H225, H317, H334	OK				The substance can cause eye irritation if it comes in direct contact in its concentrated form, which is unlikely to happen. In use, the product will be diluted and the maximum concentration of this substance after dilution is less than 5%. In this concentration, the substance is unlikely to cause any hazard if used as per instructions. Both the Applicant and Tier 1 supplier have OHS systems in place to mitigate these hazards during the manufacturing stage. There is no identifiable risk to the end user. Recycled Content: None Nanomaterials: No

* No GHS H-Statement classification

Comments:
Users should ensure to follow the instructions mentioned in the product label for safe handling. The product must be used as per the dilution rate mentioned in the product label.

OHS - Occupational Health and Safety.
