

GLOBAL GREENTAG INTERNATIONAL PRODUCT ASSESSMENT TEAM

ABRISHAM VINCENT Product Assessor

Abrisham is soon to receive a Bachelor of Environmental Science from the Southern Cross University in Australia, providing him with the necessary scientific skillset to approach research using both quantitative and qualitative methodologies to further our understanding of how the built-environment impacts human health and healing.

Abrisham is constantly seeking to explain in ever more detail the connections between built-environment and human well-being. This has led him to collaborate over 6 months with Doctor Natalia Olszewska a researcher and practitioner in Neuroscience Applied to Architectural Design on the themes of trauma, healing and built-environment which is becoming ever more relevant in this age of the Anthropocene.

Currently he is approaching the end of an undergraduate degree in environmental science at Southern Cross University in Lismore. A degree which has provided him with the necessary scientific skillset to approach research using both quantitative and qualitative methodologies to further our understanding of how the built-environment impacts human health and healing.

Abrisham is an out-of-the-box thinker fronting up to complex problems by drawing from both an artistic and scientific mindset which enables his perspective to remain flexible and open to others and therefore drive positive change across social networks.

He sees eco-labeling as a crucial point in building healthier built-environments for both human and non-human communities because it verifies who is being honest in their conduct and rewards those companies with greater consumer confidence that their products are not simply green-washed marketing ploys.

Community and environment are both of great importance to Abrisham and he sees environmental challenges as not distinct from social challenges but interdependent. He is both grateful and excited to be working among the Global Green Tag team as a Researcher & Trainee Product Assessor in a team which helps companies step ahead of their competitors through certifying their products Environmental, Social and Governance achievements.

GLOBAL GREENTAG INTERNATIONAL

Global GreenTag International provides Type 1 (third party) product certification, declaration and verification programs for manufacturers with exemplar green product lines in building materials, interiors, personal care and cleaning products.

Using Global GreenTag Cert™ (one of the most scientifically advanced, product certification standards in the world) Global GreenTag simplifies the selection of environmentally sustainable, healthy and ethical products for industries like Architecture, Design and Construction. The system both assesses and ranks products through leading LCA and LCBA based product ecolabelling and rating schemes that also include a CarbonRATE™ scheme.

Global GreenTag also provides third party, assessed product declaration programs – an Environmental Product Declaration (EPD), a Product Health Declaration (PHD) and a Modern Slavery Declaration (MSD), which is the first product level declaration of its kind in the world to help manufacturers and procurement teams eliminate modern slavery occurring in global supply chains.

Helping professionals to make informed decisions about preferred green and ethical products to protect both the health of environment, workers and consumers, Global GreenTag currently has more than 16,000 products under certification in over 22 countries, used in buildings and offices throughout Australia and the world.
