

Markant Office Furniture Sdn Bhd MOX Workstation

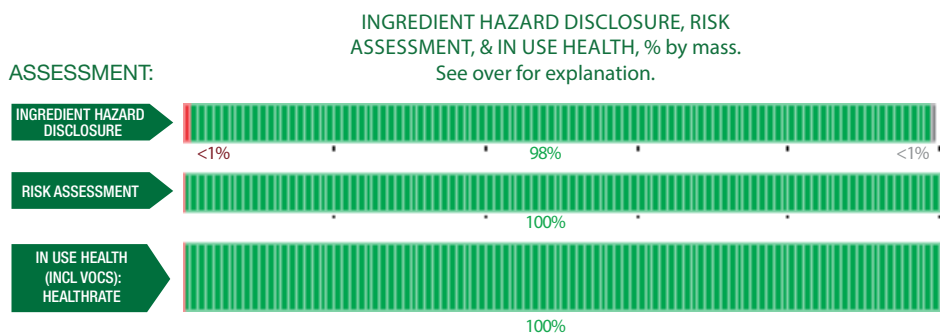

Markant's MOX range of modular workstations is designed for easy assembly and is suitable for a variety of desk configurations. It's Markant System Architecture (MSA) modular design concept, click beam and patented Eco-fits components allow the desk frames, worktop and additional accessories to be installed quickly and without the use of tools. MOX desks are height-adjustable manually using a folding handle or electrically using a motor, contributing to increased employee productivity and health due to heightened physical activity while working.

Products/Ranges:	MOX Workstation
Product Stages Assessed:	Material Inputs, manufacturing, in-use
Product Type:	Furniture
CSI Masterformat:	12 59 23 Desk System Furniture
Licensed Site/s:	Selangor, Malaysia
Licence Number:	MAK:FU01:2021:PH
Licence Date:	14th December 2021
Valid To:	14th December 2022
Standard:	GGT International v4.0
Screening Date:	10th December 2021
PHD URL:	https://www.globalgreentag.com/wp-content/uploads/2016/03/211214_MAK_MOX-Workstation_PHD_v1.pdf

PHD Summary	Inventory Threshold:	Inventory Method:
Percentage Assessed: 100%	100ppm Product Level	Nested Materials

- GreenTag Banned List Compliant.
- Meets "Green Cleaning" requirements for Green Star.
- Product Meets Optimisation requirements - No Grey or Red Light category ingredient.
- Meets USGBC LEED® v4.0 and v4.1 Rating System MR Credit: "Building Product Disclosure and Optimisation - Material Ingredients" - Option 1: Material Ingredient Reporting and Option 2 - International ACP - REACH Optimisation.
- Meets WELL™ v1.0 Features 97: Material Transparency and WELL™ v2.0 Features – X07: Material Transparency (Part 1 & 3) and X08: Material Optimisation (Part 1 & 2).
- No worker exposure to Carcinogens, Mutagens, Reproductive Toxicant or Endocrine Disruptors.
- No user exposure to Carcinogens, Mutagens, Reproductive Toxicant or Endocrine Disruptors.
- No environmental exposure to Carcinogens, Mutagens, Reproductive Toxicants or Endocrine Disruptors.

Declared by:
Global GreenTag
International Pty Ltd

David Baggs
CEO & Program Director
Verified compliant with:
ISO 14024 & ISO 17065

1.0 Scope

The Global GreenTag International (GGT) Product Health Declaration (PHD) has been designed to provide an additional level of service to the green product sector in facilitating an easier understanding of both the hazard and risk associated with any certified products and is intended to indicate:

- Chemical hazards of both finished product and unique ingredients to a minimum level of 100ppm for final product throughout the product life cycle, (including any VOC or other gaseous emissions);
- An assessment of exposure or risk associated with ingredient handling, product use, and disposal in relation to established mitigation and management processes;

It is not intended to assess:

- i. substances used or created during the manufacturing process unless they remain in the final product; or
- ii. substances created after the product is delivered for end use (e.g., if the product unusually degrades, combusts or otherwise changes chemical composition).

GGT PHDs are only issued to products that have passed GGT Standards' certification requirements. The Level of Assessment (BronzeHEALTH, SilverHEALTH GoldHEALTH or PlatinumHEALTH) rating relates ONLY to GGT Standard Sustainability Assessment Criteria 3, and is declared separately to the overall Bronze, Silver Gold or Platinum Green Tag Certification Mark Tier Levels.

1.2 Preparing an PHD

GGT PHDs are prepared using Hazard Classifications from the UN Globally Harmonised System of Classification and Labelling of Chemicals (GHS) and as an outcome of a successful Application for Certification. Assessments are undertaken by GGT Qualified Exemplar Global Lead Auditors and subsequently accepted for Certification by the GGT Program Director (also a Qualified Exemplar Global Lead Auditor) under the Personal Products Standard v1.0/1.1, and Cleaning Products Standard v1.1/1.2 and above Program Rules.

1.3 External Peer Review

Every GGT PHD is independently peer reviewed by an external Consultant Toxicologist and Member of the Australian College of Toxicology & Risk Assessment.

2.0 Declaration of Ingredients

Where a manufacturer wishes recognition under a rating program that requires transparency of ingredients such as LEED v4.0 & v4.1, WELL v1 & v2, Living Building Challenge, Estidama etc., the following information is declared from audit:

Colour	Ingredient Name
Green	Ideal- Low No concerns- ingredient safe at any level based on current known science, % of the ingredient, and relevance to use context'
Yellow	Medium to Low Hazardous Ingredient with minor level of "Issue of Concern" depending on % of the ingredient, hazard level, and relevance to use context'
Orange	Moderate Hazardous ingredient with "Issue of Concern" or "Issue of Concern Minimised" depending on % of the ingredient, hazard level, and relevance to use context'
Red	Problematic (Red): Target for Phase Hazardous ingredient with 'Red Light" or "Red Light Minimised" concern depending on % of the ingredient, hazard level, and relevance to use context'
Dark Red	Very Problematic (Dark Red): Target for Phase Very Hazardous ingredient with 'Red Light Exclusion" concern depending on % of the ingredient, hazard level, and relevance to use context'
Grey	Uncategorised Not able to be categorised due to lack of toxicity impact information.
Black	Banned Ingredients Petroleum, Parabens plus a wide range of compounds stipulated by cleaning/personal products standards.

Global GreenTag International Pty Ltd (Global GreenTag) is not a medical professional organisation. Global GreenTag does not purport to provide medical advice, and makes no warranty, representation, or guarantee regarding the declaration that it provides in relation to any allergies, chemical sensitivities or any other medical condition, nor does Global GreenTag assume any liability whatsoever arising out of the application or use of any product or piece of equipment that has been chemically assessed by Global GreenTag.

The chemical assessments carried out provide transparent information peer reviewed by a consultant toxicologist regarding the chemical make-up and ingredients of certain materials and products, but such assessments are not to be taken as any form of medical assessment or health advice and are not targeted towards providing specific solutions to allergenic conditions or any other type of medical concerns.

Users must carry out their own investigations if they are concerned about specific medical conditions and the impact of certain products or ingredients in relation to specific medical concerns.

Global GreenTag takes no responsibility and is not liable in any way with respect to any medical or health issues arising from a person's use of materials or products that have been chemically assessed by Global GreenTag. Global GreenTag shall not be liable for any direct, indirect, punitive, incidental, special or consequential damages to property or life whatsoever, arising out of or connected with the use or misuse of any materials or products that have been assessed by Global GreenTag.

Ingredient Name	CAS Number OR Function	Proportion in finished product	GHS, IARC & Endocrine Category	Exposure Category	Ingredient Assessment	Whole Of Life Assessment	In Use Health Assessment	Comment
Steel	12597-69-2	38.6-48.2% *		None				No comments Recycled Content: Unknown Nanomaterials: unknown
PA6	Ecofits, base, mounting cover, adjustable foot cap	0.62-0.78% *		None				No comment Recycled Content: Unknown Nanomaterials: unknown
ABS Edging -Worktop	Fitting	0.008-0.01% *		None				No comment Recycled Content: Unknown Nanomaterials: unknown
Melamine Particleboard E0- Worktop	Fitting	40.18-50.23% *		None				No comment Recycled Content: Unknown Nanomaterials: unknown
Bolt&Nuts	Fitting and Fasteners	0.008-0.01% *		None				No comment Recycled Content: Unknown Nanomaterials: unknown
Powdercoat (FF8/766/CM11, ZFF180/K14233/CS7, BFF160/K14020/CS16, FF165/K40110/CS17)								
Trimellitic anhydride	552-30-7	0.011-.014%	H318,317,334,335	Eye Dam. 1,Skin Sens. 1,Resp. Sens. 1,STOT SE 3				Trimellitic anhydride may cause skin irritation and eye damage. It is harmful when it is inhaled. The manufacturer has implemented a appropriate occupational health and safety system in factory. The substance forms part of a uniform melted coating and is chemically and physically embedded in the final surface coating, the hazards will not present in the final product. Therefore, it is not expected to cause harm to the users.
Declaration	Coating	0.54-0.68% *		None				Unknown substance is used. However, as there is no hazard declared, it is not expected to cause any harm .
Alumnium	7429-90-5	0.011-0.014%	H261, 228	None				No comment Recycled Content: Unknown Nanomaterials: unknown

* No GHS H-Statement classification

Comments:
VOC emissions: TVOC emission rate is 0.084mg/item/hr (within the benchmark limit less than 0.5mg/item/hr) use test method ASTM D5116-2017 "Standard Guide for Small-Scale" Environmental Chamber Determinations of Organic Emissions from Indoor Material/Products". Tested by FORAY Laboratories (NATA Accreditation 1231) on 11/08/2020.
Formaldehyde emissions: formaldehyde emission rate is 0.009mg/item/hr (within the benchmark limit less than 0.1mg/item/hr) use test method ASTM D5116-2017. Tested by FORAY Laboratories (NATA Accreditation 1231) on 11/08/2020.
